

# Learn to fish Spey rods for winter Steelhead

Learn to cast a Spey rod and Skagit head system

Learn effective mending and line control on the water

Emphasis on how to read water and identify productive water to fish with a swung fly

Understand the appropriate use of sink tips in various water conditions

Learn the basics of tying practical, durable winter Steelhead fly patterns

Gain insight on how fly construction affects movement in the water and reaching the correct depth in holding water

Put all of your newfound knowledge to use with three days on the water instruction while you fish.

In addition to what you learn each participant will receive a brand new 13'3" Redington RS4 Spey Rod and CDL Reel With an airflow compact Skagit Shooting head

**Cost is \$375.00 per person per day**

A strict minimum of four and maximum of six clients per trip  
Please see our website at [www.castawayguideservice.com](http://www.castawayguideservice.com) for available dates

When it comes to getting better at catching steelhead nothing beats time on the water. That is why Castaway guide service is pleased to announce our on the water Spey fishing clinics. Having always believed in the idea that a guided trip should increase your knowledge and ability to be successful when fishing on your own. We are now taking it a step further by offering the chance

to learn in depth aspects of the art of steelheading that we could not offer in a single day of guided fishing due to time constraints. Another plus to these multi-day trips is the chance to fully commit yourself to three days of steelhead fishing, giving ample time for fine tuning of your casting and fishing skills.

When you are not enjoying food and wine at the house in the evenings these all inclusive trips have an additional advantage of allowing you to spend time with multiple professional guides both on and off the water, giving plenty of time for both on the water instruction and off the water questions as you reflect on your day and all that you have learned. Nights will be spent learning about one of the other important aspects of steelhead fishing, Fly tying. You will not only learn how to tie some of our most productive patterns but the reasoning behind our construction techniques. Then you will get to try your hand at making the perfect batch of flies for the following days of fishing or duplicating that days most productive pattern.

Additionally due to our excellent working relationship with Redington rods each participant in the clinic will receive what we have found to be one of the best choices of Spey rods for fishing the coastal rivers the 13'3" RS4 and Titanium CDL series reels, Yours to fish with when you are here and take home with you when you leave.

Many thanks to,
